

Lines & Angles

⑨ $11x + 37 + 18x - 5 = 90$

^{59°} ~~11x~~ + 37 + ^{31°} ~~18x~~ - 5 = 90

$$29x + 32 = 90$$

$$\underline{-32 \quad -32}$$

$$29x = 58$$

$$\underline{\quad \quad \quad 29}$$

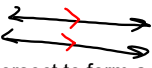

$x = 2$ 59°

title

Sep 21-9:27 AM

Parallel lines—lines that do not intersect and are coplanar

- The symbol for "is parallel to" is \parallel . $l \parallel r$
- Arrows denote parallel lines.

Perpendicular lines—lines that intersect to form a right angle

- The symbol for "is perpendicular to" is \perp . $l \perp n$
- The right angle symbol denotes perpendicular lines.

Skew lines—lines that do not intersect and are *not* coplanar

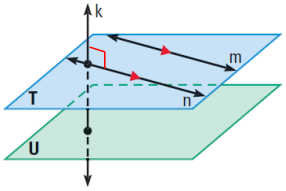

Give an example of each from the diagram.

Parallel lines $n \parallel m$

Perpendicular lines $k \perp n$

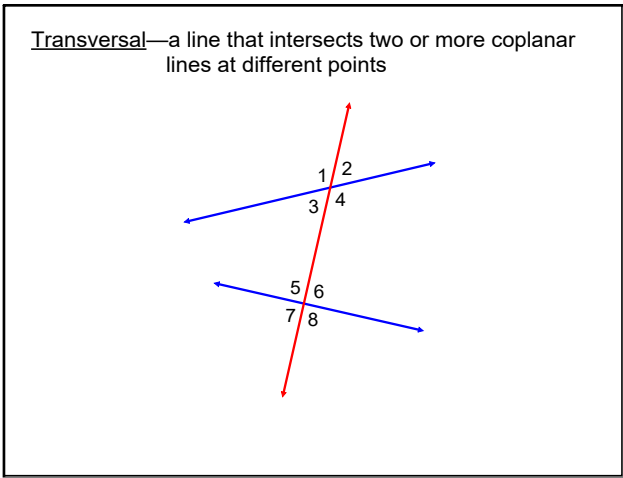

Skew lines k and m

Parallel planes $T \parallel U$

pairs of lines

examples

transversal

Angles Formed by Transversals

Corresponding angles:
occupy corresponding positions
 $\angle 1 \cong \angle 5, \angle 4 \cong \angle 8$
 $\angle 2 \cong \angle 6, \angle 3 \cong \angle 7$

Alternate exterior angles:
lie **outside** the two lines on **opposite sides** of the transversal
 $\angle 1 \cong \angle 8, \angle 2 \cong \angle 7$

Alternate interior angles:
lie **between** the two lines on **opposite sides** of the transversal
 $\angle 3 \cong \angle 6, \angle 4 \cong \angle 5$

angles

Angles Formed by Transversals

Consecutive exterior angles:
lie **outside** the two lines on the **same side** of the transversal
➤ Also called *same side exterior angles*.
 $\angle 1 + \angle 7$
 $\angle 2 + \angle 8$

Consecutive interior angles:
lie **between** the two lines on the **same side** of the transversal
➤ Also called *same side interior angles*.
 $\angle 3 + \angle 5, \angle 4 + \angle 6$

angles

Conclusion

Name the following:

Alt. Ext. $\angle 7 \cong \angle 8, \angle 2 \cong \angle 4$
Consecutive Int. $\angle 5 + \angle 3, \angle 6 + \angle 4$
Corresponding $\angle 2 \cong \angle 1, \angle 7 \cong \angle 3$
Vertical $\angle 7 \cong \angle 6, \angle 4 \cong \angle 1$
Consecutive Ext. $\angle 7 + \angle 4, \angle 2 + \angle 8$
Alt. Interior $\angle 5 + \angle 1, \angle 6 + \angle 3$
Any Questions??????
